Objective

My current goal is to find a future friendly work environment where I will be challenged even further to enhance my abilities to create both beautiful design and write beautiful code.

Skills

HTML / CSS / LESS	Javascript / jQuery	AngularJS
NodeJS	Adobe CS6	PHP
Firebase	API Integrations	User Experience Design
Atlassian Products	Wordpress	Responsive Design

Experience

Front-end Developer | Dillard's Inc | 2012 – Present

Dillard's has taught me a lot about the corporate environment, being part of an agile team, and working alongside other developers. I started developing in Java (Struts), transitioned to front-end as part of the foundation team, and now I am working as part of the import invoice team. I have learned a lot about working in various development stacks as well as working with a variety of people; including other agile roles, such as: Usability, QA, Developers, and BAs.

Tech Services | University of Central Arkansas | 2010 – 2012

Working at the College of Business at the University of Arkansas taught me a lot about maintaining computers and technology related equipment. My duties were re-imaging computers, updating software and hardware, installing new software, creating reports, and creating graphics. I also assisted professors with computer, media lectern, and projector related issues.

Desk Manager | College Square Retirement | 2006 – 2012

As the sole employee on the premises between 6PM - 12PM I performed office activities such as: maintained a 6 line phone, both large and small transactions, sorting, copying, and faxing. I also provided assistance to the residents in the case of emergency. For example: provided 911 calls, helped residents with various tasks, and provided minor medical assistance.

Education

Bachelor of Business Administration | University of Central Arkansas

BBA in Management Information Systems with a focus on Web Development and Ecommerce
